

2023 TEK INTERNSHIP

Cache Creek Conservancy has opened admission for the Spring 2023 Traditional Ecological Knowledge Youth Internship in the Tending and Gathering Garden at the Cache Creek Nature Preserve, located in Yolo County, just 5 miles west of Woodland!

Hands-On Learning

The TEK Youth Internship provides students with the opportunity to gain practical work experience, knowledge of various ecological management techniques and their importance in both land management and fiber arts.

Individual Development

Participants are expected to complete at least 30 hours of work in an immersive environment to learn about the history, culture, art and landscape of what we now know as California. Students will complete a project and reflection at the end of the program.

Mentorship

Students learn in a welcoming community based environment that includes group learning and one on one time with cultural arts instructors, conservancy staff and undergraduate level student mentors and professors.

- 🌿 Program runs February 26 - April 16
- 🌿 Class meets every other Sunday from 10 to 3
